

INDUSTRIAL EFFICIENCY DECARBONISE INDUSTRY!

2020
14-17
SEPT

DIGITAL EVENT

Exploring best practice and emerging trends in energy efficiency policy, technology and management – including new business models, digitalisation, resource efficiency and more.

Organised in cooperation with

ecee Industrial Summer Study proceedings

Online version

ISSN: 2001-7987/ISBN: 978-91-983878-7-2

Acknowledgements

The eceee board would like to convey a special thanks to the partners, whose support makes this event possible. The board would also like to thank all the authors and the panel leaders for their intense efforts to contribute to these proceedings. We gratefully acknowledge the support of all the anonymous helpers who have assisted in making Industrial Efficiency 2020 a success.

ORGANISED IN COOPERATION WITH

Chalmers Industriteknik (CIT)

GOLD PARTNERS

Swedish Energy Agency
Chalmers University of Technology

SILVER PARTNER

Agence de l'Environnement et de la Maîtrise de l'Energie (ADEME)

PARTNERS

Deutsche Unternehmensinitiative Energieeffizienz (DENEFF)
Energieeffektiviseringsföretagen (EEF)
The European Industrial Insulation Foundation (EiiF)
EnR
Energy in Demand
Fraunhofer Institute for Systems and Innovation Research
Rockwool Technical Insulation
In4Climate.NRW
Institute for Energy Efficiency in Production at the University of Stuttgart (EEP)

PANEL LEADERS

PANEL 1. **Policies and programmes to drive transformation**

Hannes Mac Nulty Mac Nulty Consulting, France
Jenny Chu The Climate Group, United Kingdom

PANEL 2. **Sustainable production towards a circular economy**

Andrea Herbst Fraunhofer ISI, Germany
Simone Zanoni Università degli Studi di Brescia, Italy

PANEL 3. **Energy management – in real life**

Hannes von Knorring CIT Industriell Energi AB, Sweden
Reinhard Ungerböck Grazer ENERGIEAgentur GmbH, Austria

PANEL 4. **Technology, processes and systems**

Anna Realini Ricerca sul Sistema Energetico – RSE S.p.A., Italy
Simon Harvey Chalmers University of Technology, Sweden

PANEL 5. **Business models and finance in the age of digitalisation**

Diana Wang Institute for Energy Efficiency in Production (EEP), University of Stuttgart, Germany
Rod Janssen Energy in Demand, United Kingdom/France

PANEL 6. **Deep decarbonisation of industry – technologies, strategies & implications for policy, industry and research**

Marlene Arens Lund University, Sweden
Stefan Lechtenböhmer Wuppertal Institute for Climate Environment and Energy, Germany

CONFERENCE MANAGERS

Therese Laitinen Lindström, Nils Borg & Ylva Blume

CONFERENCE CO-CHAIRS

Hanna Tornevall, Agneta Persson & Clemens Rohde

EXECUTIVE DIRECTOR

Nils Borg

ECEEE BOARD

Board members

Agneta Persson, Anthesis Group, Sweden (ecee President)

Joanne Wade, ADE, UK (ecee Vice President)

Andrea Roscetti, Kyoto Club, Italy (ecee Vice President)

Cédric Jeanneret, SIG, Switzerland

Didier Bossebœuf, French Agency for Environment and Energy (ADEME), France

Clemens Rohde, Fraunhofer Institute for Systems and Innovation Research, Germany

Adrian Joyce, EuroACE

Fiona Hall, Advisor to Rockwool International

Erwin Cornelis, Tractebel Engineering S.A., Belgium

Jan Rosenow, Regulatory Assistance Project (RAP), Belgium

Paula Fonseca, University of Coimbra, Portugal

Vesna Kolega, Silvosus, Croatia

Rod Janssen, Energy in Demand, France

Alternates

Barbara Schlomann, Fraunhofer Institute for Systems and Innovation Research, Germany

Lorenzo Pagliano, Kyoto Club, Italy

Samuel Thomas, Regulatory Assistance Project (RAP), France

Table of contents

eccee 2020 Industrial Summer Study proceedings

These proceedings include the peer-reviewed papers from Industrial Efficiency 2020. The accepted extended abstracts, also presented at the conference, can be found together with the online version of the proceedings on the eccee proceedings web site: https://www.eccee.org/library/conference_proceedings/.

PANEL 1. POLICIES AND PROGRAMMES TO DRIVE TRANSFORMATION

Introduction to Panel 1

	Panel Leaders: Hannes Mac Nulty & Jenny Chu	1
1-004-20	Shaping a sustainable industry: conclusions from round table meetings Erwin Cornelis & Karlis Goldstein	3
1-021-20	Review of regional energy efficiency policies towards industrial SMEs from within Europe Ida Johansson, Patrik Thollander, Dietmar Baurecht, Christian Engers, Enrique Esteban, Maya Janssen, Mihai Marian, Katrin Schalk & Giovanni Scimemi	15
1-089-20	Energy efficiency networks: latest developments in Germany and in the world Clemens Rohde, Antoine Durand, Lisa Neusel, Anton Barckhausen & Miha Jensterle	23
1-116-20	Low-carbon transition in the steel industry: a comparative study of Iran and Sweden Soma Rahmani & Mohsen Alizadeh Sani	35

PANEL 2. SUSTAINABLE PRODUCTION TOWARDS A CIRCULAR ECONOMY

Introduction to Panel 2

	Panel leaders: Andrea Herbst & Simone Zanoni	45
2-023-20	The energy of exergy – analysis of different olefin production routes Markus Fritz & Ali Aydemir	49
2-027-20	Beyond EU 2020 target for energy efficiency: a novel business model to reduce energy consumption in compressed air systems Elvira Rakova, Matteo Martinelli & Luca Pagni	59
2-029-20	Roadmap for climate transition of the building and construction industry – a supply chain analysis including primary production of steel and cement Ida Karlsson, Alla Toktarova, Filip Johnsson, Mikael Odenberger & Johan Rootzén	67
2-037-20	Simulating geographically distributed production networks of a climate neutral European petrochemical industry Clemens Schneider & Mathieu Saurat	79
2-074-20	Utilization of industrial and agricultural by-products in blended cement mortars – creating an effort of circular economy in Indian cement industry Navdeep Singh & Marlene Arens	91
2-084-20	Energy efficiency from farm to fork? On the relevance of non-energy benefits and behavioural aspects along the cold supply chain Lisa Neusel, Simon Hirzel, Simone Zanoni & Beatrice Marchi	101
2-115-20	Business logics for bioeconomy collaborations Jon Williamsson, Gabriela Schaad & Anders Sandoff	111
2-125-20	A multi-region representation of an automotive manufacturing plant with the TIMES energy model Senatro Di Leo, Filomena Pietrapertosa, Monica Salvia & Carmelina Cosmi	121
2-137-20	Modelling circular economy action impacts in the building sector on the EU cement industry Matthias Rehfeldt, Andrea Herbst & Samy Porteron	133

PANEL 3. ENERGY MANAGEMENT – IN REAL LIFE**Introduction to Panel 3**

	Panel leaders: Hannes von Knorring & Reinhard Ungerböck	145
3-007-20	How do companies decide on non-strategic energy efficiency issues? An in-depth study of the decision-making process Joachim Globisch & Elisabeth Dütschke	147
3-009-20	Non-routine adjustments – towards standardizing M&V approach for quantifying the effects of static factors Shankar Earni & Peter Therkelsen	159
3-048-20	Human factors for energy management: features, fit and field study Kelly M. Smith & Maureen E. Hassall	171
3-070-20	Establishing energy efficiency in SMEs – energy management to enhance energy efficiency in everyday work life Werner König, Sabine Löbbe, Stefan M. Büttner & Christian Schneider	181
3-079-20	Understanding the impacts on the industrial operations from the adoption of energy efficiency measures: lessons learnt from Italian case studies Davide Accordini, Enrico Cagno, Nicolò Ferrari, Federico Gambaro & Andrea Trianni	191
3-081-20	Quantifying non-energy benefits for energy-intensive industry – a case study of heat recovery measures in a Swedish oil refinery Sofie Marton, Elin Svensson & Simon Harvey	199
3-157-20	Energy management in the Norwegian sawmill industry Marcus R. Olsson	209

PANEL 4. TECHNOLOGY, PROCESSES AND SYSTEMS**Introduction to Panel 4**

	Panel leaders: Simon Harvey & Anna Realini	219
4-001-20	Environmental impact of high temperature industrial heat pumps – from a global warming potential (GWP) perspective Tor-Martin Tveit, Umara Khan & Ron Zevenhoven	223
4-008-20	Effects of process decarbonisation on future targets for excess heat delivery from an industrial process plant Pontus Bokinge, Elin Svensson & Simon Harvey	233
4-018-20	Evaluation of hybrid electric/gas steam generation for a chemical plant under future energy market scenarios Holger Wiertzema, Elin Svensson & Simon Harvey	243
4-036-20	White certificate on electrical motor driven systems Marc Berthou, Abdessalim Arras & François Saliou	253
4-056-20	Ultra-low charge ammonia chillers for energy efficiency in industrial applications Ammi Amarnath, Mukesh Khattar, Sara Beaini, Aaron Tam, Chris Holmes & Colin Lee	265
4-057-20	Requirements engineering and morphological analysis of adaptive control strategies for flywheel energy storage systems in industrial applications Raoul Laribi, Yijun Lu, Darian Andreas Schaab, Christian Dierolf & Alexander Sauer	273
4-073-20	Industrial excess heat and district heating: potentials and costs for the EU-28 on the basis of network analysis Ali Aydemir, David Schilling, Tobias Fleiter & Mostafa Fallahnejad	285
4-092-20	Double transmission double expansion technology as a method for reducing energy losses associated with oversizing of industrial compressed air systems Dominik Gryboś & Jacek S. Leszczyński	295
4-108-20	Decarbonizing Swiss industrial sectors by process integration, electrification, and traditional energy efficiency measures M. Jibrán S. Zuberi, Navdeep Bhadbhade, Martin K. Patel, Anna Sophia Wallerand, François Maréchal, Cordin Arpagaus, Stefan Bertsch & Beat Wellig	307
4-109-20	Assessing emerging energy-efficient technologies for industry – application of the EDUAR&D methodology for the case of high temperature electrolyzers Oliver Lösch, Eberhard Jochem, Gregor Zesch & Ulrich Schmoch	319
4-132-20	High temperature heat pumps for industrial processes – application and potential Veronika Wilk, Franz Helmingier & Michael Lauerermann	329
4-155-20	Value chain-wide energy efficiency potentials of additive manufacturing with metals – some preliminary hypotheses Andreas Pastowski & Georg Kobiela	335
4-156-20	Analysis of heat pump integration into drying process for decarbonization in industry Takenobu Kaida, Yannick Beucher, Florence de Carlan & Jean-Marie Fourmigue	345

PANEL 5. BUSINESS MODELS AND FINANCE IN THE AGE OF DIGITALISATION**Introduction to Panel 5**

	Panel leaders: Diana Wang & Rod Janssen	357
5-012-20	De-carbonisation, guaranteed: realising affordable, equitable and long-term financing for industrial SME projects Winfried Braumann & Jason Erwin	359
5-106-20	EU Taxonomy on sustainable economic activities – preliminary assessment of the implications for corporate energy efficiency investments Bettina Dorendorf	371
5-127-20	Financial carbon footprint: calculating banks’ scope 3 emissions of assets and loans Jens Teubler & Markus Köhlert	381

PANEL 6. DEEP DECARBONISATION OF INDUSTRY – TECHNOLOGIES, STRATEGIES & IMPLICATIONS FOR POLICY, INDUSTRY AND RESEARCH**Introduction to Panel 6**

	Panel leaders: Marlene Arens & Stefan Lechtenböhmer	391
6-024-20	100 % renewable energy for Austria’s industry: alternative energy sources and infrastructure requirements Roman Geyer, Sophie Knöttner, Christian Diendorfer & Gerwin Drexler-Schmid	395
6-035-20	Deep decarbonisation of iron and steel industry in the age of global supply chain – issues and solutions Xianli Zhu	405
6-040-20	Electrify everything! Challenges and opportunities associated with increased electrification of industrial processes Johan Rootzén, Holger Wiertzema, Magnus Brolin & Jesse Fahnestock	415
6-043-20	Assessment of transition pathways for the Nigerian cement sector María Yetano Roche	425
6-063-20	Electrification of primary steel production based on SIDERWIN process: simulation on the European power system in 2050 Morgan Barberousse, Matthildi Apostolou, Anne Debregeas & Caroline Bono	435
6-065-20	Meta-analysis of industry sector transformation strategies in German, European and global deep decarbonisation scenarios Sascha Samadi & Claus Barthel	445
6-082-20	A European industrial development policy for prosperity and zero emissions Lars J. Nilsson, Max Åhman, Fredric Bauer, Karin Ericsson, Bengt Johansson, Mariësse van Sluisveld, Valentin Vogl, Fredrik N.G. Andersson, Chris Bataille, Stephane de la Rue du Can, Teis Hansen, Stefan Lechtenböhmer & Danielle Schiro	457
6-094-20	Dynamics of cross-industry low-carbon innovation in energy-intensive industries Annika Tönjes, Katharina Knoop, Tobias Lechtenböhmer, Helena Mölter & Katja Witte	467
6-098-20	Needs of electricity, hydrogen and carbon infrastructures for greenhouse gas neutral heavy industry clusters in the EU 2050 Frank Merten, Arjuna Nebel, Christine Krüger, Clemens Schneider, Alexander Scholz & Ansgar Taubitz	477
6-110-20	Hydrogen technologies for a CO₂-neutral chemical industry – a plant-specific bottom-up assessment of pathways to decarbonise the German chemical industry Marius Neuwirth & Tobias Fleiter	487
6-134-20	Feasibility study of low-carbon ammonia and steel production in Europe Jean-Luc Hoxha, Alexis Donceel, Marc Philippart de Foy, Grégoire Léonard, Mathieu Caspar, Justin Fraselle & Rémi Poncelet	499
6-141-20	Deep decarbonisation of the German industry via electricity or gas? A scenario-based comparison of pathways Tobias Fleiter, Matthias Rehfeldt, Marius Neuwirth & Andrea Herbst	509
6-149-20	How does the German manufacturing industry react to the calls to decarbonise? Stefan M. Büttner, Christian Schneider, Chiara Piccolroaz, Alexander Sauer, Werner König & Hannes Mac Nulty	521
